

Ecology of Animal Migration

International PhD-student course

at Lund University

29 Sept - 9 Oct 2009

Arranged by the Centre for Animal Movement Research
(CANMove) and
the Department of Animal Ecology
at Lund University

Course coordinators:
Prof. Susanne Åkesson and Prof. Thomas Alerstam

Lectures will be given by international authorities in the field as well as by researchers in the Bird Migration Research Group at Lund University. During the course there will also be time for wind tunnel, radar and orientation demonstrations, student presentations of their own research projects and ample time for discussions, excursion and own project.

Main themes that will be covered include locomotion, ecophysiology, orientation and navigation, genetics and evolution of migration, migration patterns, conservation and theoretical modelling of animal migration. The migration of birds, insects, fish, amphibians and mammals will be covered during the course.

The course fee is: 2500 SEK.
